## Belt Services Maintenance

LE STANDARD Sarl is backed by extensive field service and maintenance agreements, ensuring longevity and superior product performance.

With years of application experience, maintenance management, and a mobile workforce of field technicians based throughout the continent, our experienced field service teams have a thorough understanding of the challenges of conveyor systems. They know that proper installation and maintenance can extend conveyor life and performance.

Our field service technicians conduct regular site visits for service and maintenance, preventive maintenance and life cycle management to ensure your conveyor system is operating at its full potential.

Are hostility audits encompassing each component at the conveyor system. We have developed a propriety digital conveyor Audit reporting system that our technicians use daily to survey belt and send real-time feedback to our customers by email. The ... reports provide comprehensive feedback on the condition and performance of each component in the system together with photos showing areas of concern, required maintenance and recommendations on how to optimize your entire conveyor system.

Where immediate action is required, Warning Reports will be generated and sent to the relevant parties for immediate action.

Our technicians are highly experienced and trained to perform these inspections. We have teals conducting conveyor audits at customer sites across the African continent on a daily basis. Digital reports are distributed to relevant parties directly and maintained in a centra repository for ease of reference.

## **THE PROBLEMS WE SOLVE**

Our service starts with understanding the root cause of your conveyor challenges, as well as their impact on your mining operation.

With this knowledge as a foundation, we're able to offer a full range of solutions for the following common conveyor problems.

- Belt Misalignment
- Belt Cleaning
- Impact, Dust & Spillage Solutions
- Belt Fasteners
- Safety Hazards
- Component Damage of Failure

Once the scope of your requirements are clear, we work with you to select the right products and ensure optimal positioning with your conveyor system.

Installation of your conveyor components is handled by trained professionals.
